Unbox & Inspect

01 Unbox & Inspect

What's in the Box?

The Spartan Guardian is shipped with the following standard parts:

1. Spartan Guardian
2. Master Card (x1)
3. User Card (x1)
4. Charger and Cable (x1)
5. Key Fob (x1)
6. Override Keys (x2)
7. T-Bar Mounting System (x1)

- The above image shows the other available chargers
- L-R; Australia/New Zealand; USA; UK
- These and the car charger shown in the main image are available for selection when ordering a Spartan Guardian. They can also be purchased as accessories.

01 Unbox & Inspect

First Steps

Before you start using the Spartan Guardian, please take a moment to double-check that everything you ordered has arrived safely and in good condition.

1. Carefully take the Spartan Guardian out of its box.
2. Check the safe for any damage.
3. Make sure all the parts are there and in good shape:
 - Spartan Guardian
 - Master Card (x1)
 - User Card (x1)
 - Key Fob (x1)
 - Override Keys (x2)
 - Charger and Cable (x1)
 - T-Bar Mounting System (x1)

Section 02

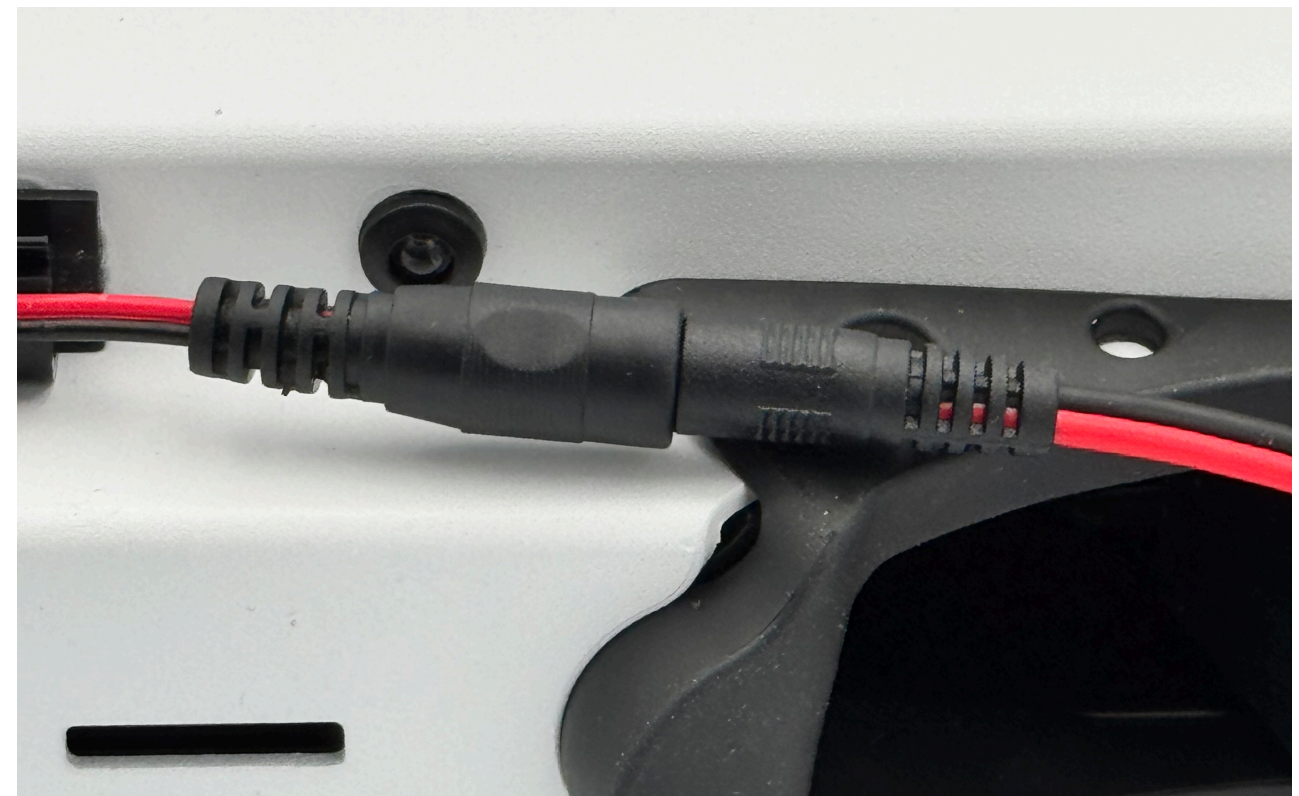

Battery Charging

02 Battery Charging

The Spartan Guardian comes with a built-in Lithium Iron Phosphate battery (LiFePO4) that can last for weeks on a single charge. Before using it for its intended purpose, make sure the battery is fully charged. UDT requires that the Spartan Guardian be shipped with a charge level between 60% and 80%.

Here's how to charge your Guardian:

1. Plug the charger into the charging port on the Guardian.
2. Plug the vehicle or wall connector into the power source.
3. You'll see the external LED indicator next to the charging port start flashing in different colors. This means the battery is charging!
4. When the LED indicator turns to a constant green, it means the battery is fully charged.

Section 03

Unlocking the Spartan Guardian with RFID Devices

03 Unlocking the Spartan Guardian with RFID Devices

Once the battery is fully charged, it's crucial to make sure the RFID system is working properly. The Guardian will come with all the RFID devices already paired to it, so the checks should be a breeze. Here's how you can do it:

Here's how you can set up your Spartan:

1. Hold the User Card against the Spartan logo on the lid and make sure it opens.
2. Check that the blue internal LED is on.
3. Close the lid, making sure the latch is fully engaged in the lock.
4. Now, take the Key Fob and hold it against the Spartan logo. Make sure the lid opens again, and again, check that the blue internal LED is on.

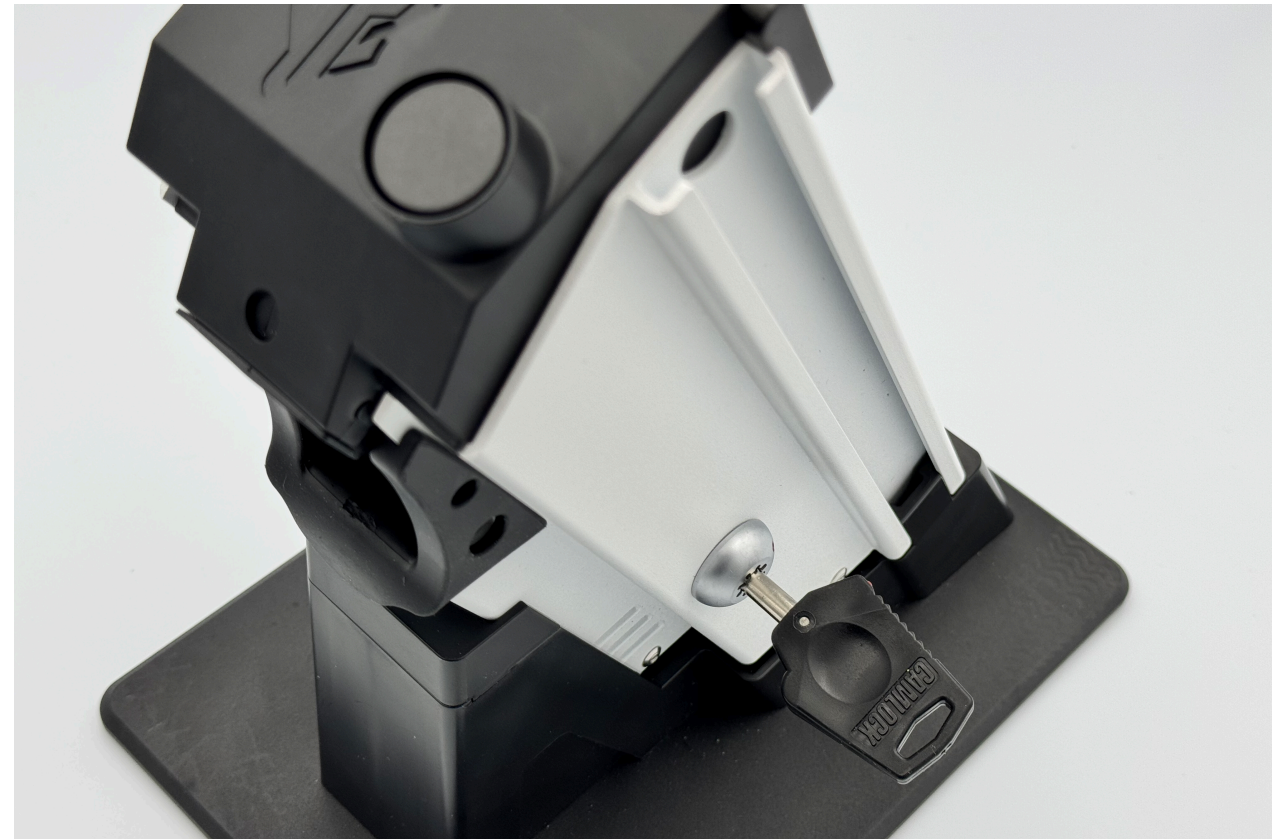

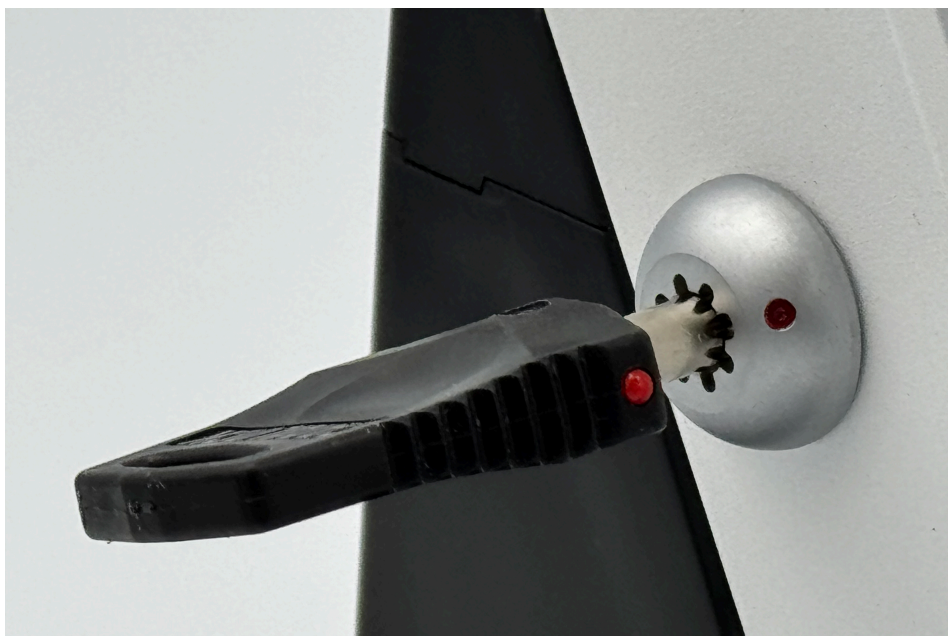

Section 04

Unlocking the Spartan Guardian with the Manual Lock

04 Unlocking the Spartan Guardian with the Manual Lock

In case the Guardian experiences an electrical malfunction or the battery runs out, there's a manual override locking and unlocking system that's provided with two keys. Let's test it out!

1. Line up the red dots on the key and override lock.
2. Insert the key and twist it clockwise. This will open the lid.
3. Check that the blue internal LED is on.
4. Close the lid, making sure the latch is fully engaged in the lock.
5. Now, take the second key and repeat step 2 ensuring the lid opens.

Section 05

Maintenance, Care and Product Safety

05 Maintenance, Care and Product Safety

You've checked everything, charged the battery (and kept it charged!), and stored your handgun safely. Now, what's next? Caring for the Guardian is a great place to start. Here are a few tips to help you out.

1. To keep your Guardian in top shape, remember to check and charge the battery at least once every four weeks.
2. Also, give it a good clean with a dry cloth. Avoid using harsh chemicals or solvents, as they can damage the Guardian.
3. Keep your Master Card, User Card, Key Fob and any other RFID unlocking devices in a safe, separate location.
4. Always verify the lock mechanism is functioning properly before storing firearms.

Section 06

Installation of the 'Shorty' Mounting Rail

06 Installation of the 'Shorty' Mounting Rail

Each Spartan Guardian is supplied with a short mounting rail as standard. Installation is relatively straightforward and is covered over the following pages.

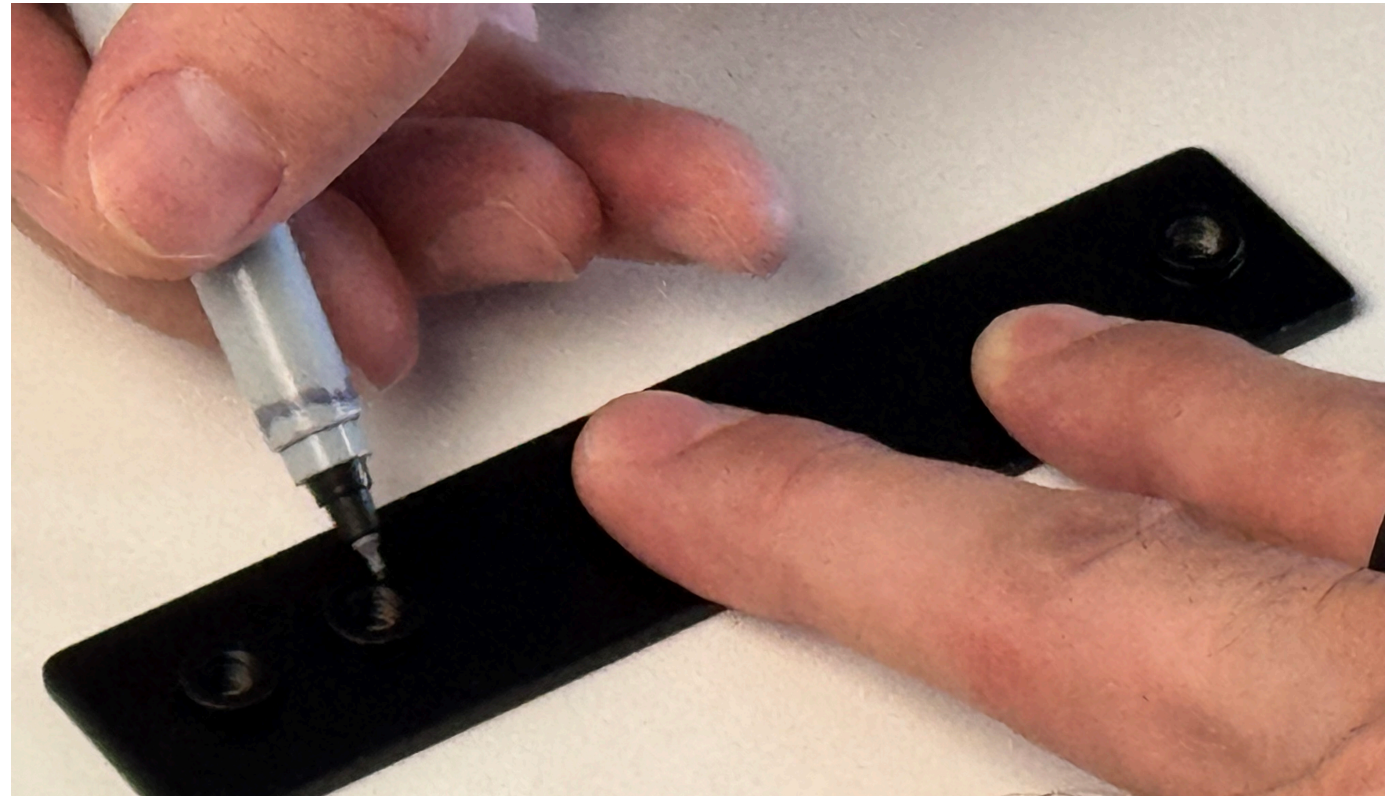

1. The rail is supplied with the following parts:
 1. Mounting rail
 2. Back plate
 3. 3x M3 x 50mm screws
 4. 3x M3 x 80mm screws
2. Tools required:
 1. 2.5mm hex driver
 2. 3mm hex driver
 3. 5mm or 3/16" drill bit

06 Installation of the 'Shorty' Mounting Rail

First of all ensure that the surface you wish to install the mounting rail onto is suitably load bearing, can be safely drilled and that there are no obstructions on the rear side.

1. Using the back plate as a template, mark the three drill points on the mounting surface and then drill as necessary.
 1. The screws provided are Metric M5 size, so a 5mm drill will be perfect for the job. However, a 3/16" drill will still ensure a good fit.
2. Using a 2.5mm hex driver, remove the screw securing the spring tab in place.

06 Installation of the 'Shorty' Mounting Rail

Each Spartan Guardian is supplied with a mounting rail. Installation is relatively straightforward and is covered over the following pages.

1. Taking a 3mm hex driver, thread the three M5 screws through the mounting rail and feed into the backing plate that should be positioned on the reverse side of the mounting surface.

06 Installation of the 'Shorty' Mounting Rail

Each Spartan Guardian is supplied with a mounting rail. Installation is relatively straightforward and is covered over the following pages.

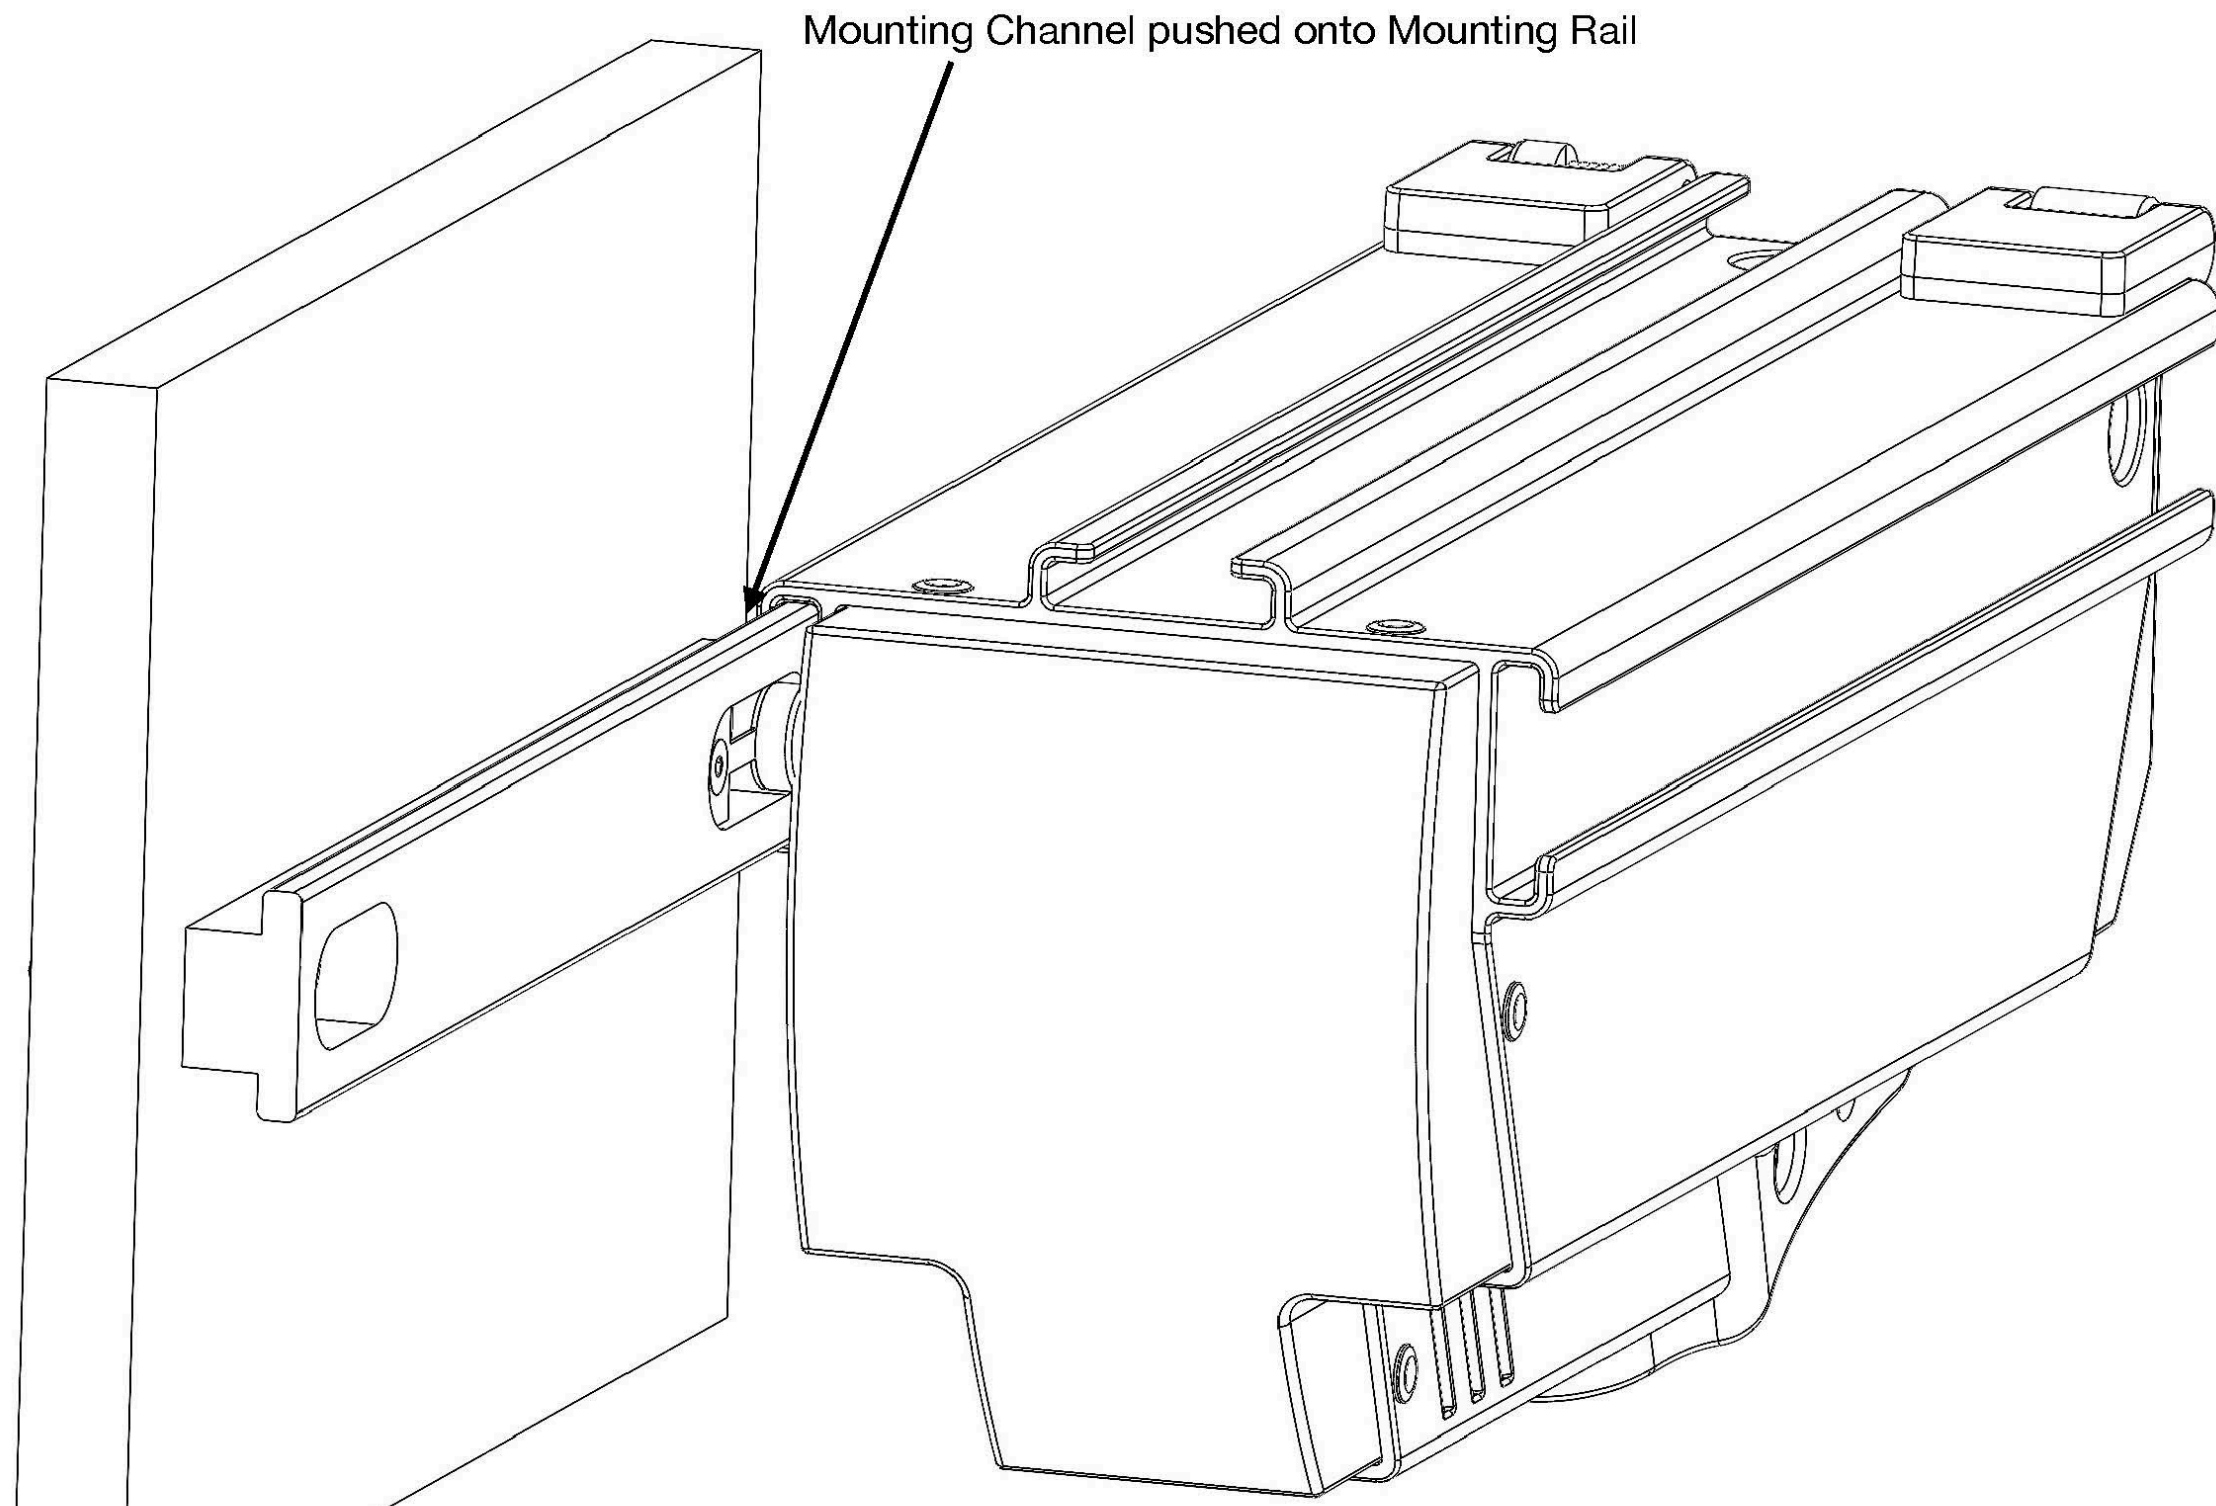

1. Take the 2.5mm driver and refit the spring tab into position. This should now cover the M5 screw that has just been fitted.
2. Check that the tab sits above the top surface of the mounting rail.
3. The mounting rail is now ready to have the Spartan Guardian fitted to it.

Quick Start Guide

This Quick Start Guide is here to help Spartan Guardian users get started super fast, but it's super important that you know everything about the product. So, take some time to read the full User Manual and other instructions - you can find these documents on our website at www.ultimatedefense.com/downloads, and don't forget to keep checking back as other documents will be added over time.

California Proposition 65 Warning

Warning: Cables, Cable Assemblies and Printed Circuit Boards can expose you to chemicals including lead/lead-based compounds and DEHP which are known to the state of California to cause cancer and birth defects or other reproductive harm. For more information go to: www.P65warnings.ca.gov

WARNING: This gun safe does not meet the safety standards for gun safes specified in California Penal Code Section 23650. It does not satisfy the requirements of Penal Code Section 23635, which mandates that all firearms sold in California be accompanied by a firearm safety device or proof of ownership, as required by law, of a gun safe that meets the Section 23650 minimum safety standards developed by the California Attorney General.

WARNING: Storing weapons in the SPARTAN GUARDIAN® is at the Customer's risk. Furthermore, UDT does not make a foolproof firearm security system. No product sold by UDT is intended to substitute for a government-regulated gun safe. Should your state or country require a gun safe for gun storage, UDT makes no representation that the SPARTAN GUARDIAN® meets your state or country's gun safe requirements (See, e.g., California State Penal Code Section 23650). Furthermore, locks are not failsafes and may fail for any reason. Any direct, indirect, punitive, incidental, special or consequential damage to property or persons arising from the reliance on a locking mechanism is assumed by Customer and UDT shall not be liable for said failure.

09 | Speak to Us

It's really important to understand how the Spartan Guardian works, so if you have any questions, don't hesitate to reach out to UDT - and remember, there's no such thing as a stupid question. We may not be able to help you with which wine goes best with fish or whether you really need that new car, but we can definitely help you with all things Spartan Guardian!
